Empowering Deaf communities to shape their social wellbeing through citizen science and collaboration with hearing individuals

# ACTING4DHH

77

## Summary

### Scaling Up the Successful Approach of the Acting4DHH Project

The goal of this project is to expand the successful strategies implemented locally in Thessaloniki, Greece, during the Acting4DHH initiative (IMPETUS Accelerator 2024, kickstarting grant, June 2024 - January 2025, (https://impetus4cs.eu/acting4dhh/).

### **Engaging DHH Communities**

Three Deaf and Hard-of-Hearing (DHH) communities from Poland, Slovakia, and Ukraine will participate in a citizen social science (CSS) action aimed at promoting social well-being among DHH communities across Europe.

The project will kick off with a meeting in Thessaloniki, where the Association of the Deaf of Northern Greece (EKVE) will share valuable insights from the Acting4DHH project with their European colleagues.

Thanks to the transnational and multicultural aspects of Acting4DHH II, we expect to generate new insights into inclusive and accessible CSS, ensuring that the needs, values, and participatory methods relevant to DHH individuals are accurately reflected at the European level.

### Key Project Activities:

- Transnational face-to-face workshop for DHH educators in Thessaloniki, Greece
- Launch of the Acting4DHH II page on SciStarter
- Video series showcasing collaboration between Deaf and Hearing individuals for social well-being
- Acting4DHH II Testimonials
